We were in hopes of chronicling the election of John Sherman this morning, but that desir will be the course of events during the ensu-ing week is now exceedingly problematical. We can only hope that an organization, such as we shall have reason to rejoice at, may be effected. If it is not effected the early part of

That gentleman, for a long time indulg ing in the hope that the so-called Democratic himself independent of its dictation. But that hope he seems to have abandoned; hence with the straight-forward honesty and characteris-tic singleness of purpose, has struck hands with those by whom that corrupt and tyranni-cal organisation with be overthrown. with the miffling and equivocation the halfwith the sniffling and equivocating, the halt-ing, twisting and crawfishing of the Anti-Lecompton Democrats of Illinois, with whem Hickman set out in opposition to the last Kan-sas iniquity, that in praising him we utter un-qualified condemnation of them. and they are false. He is a man; they are

Democratic politicians of the school of Douglas We do not know how earnestly Mr. Hickman's course will be approved by those in whose name and by whose authority he speaks; the honest men of all parties in the North, for the fearlessness and integrity which are apparent in his speeches and in his votes. It is a misfortune of the times, consequent upon party has not in its ranks more men worth to be Mr. Hickman's peers.

Wasgington, Dec. 15, 11 a. w. rted this morning that four Anti-Lecomptonists will vote for Sherman to-day, viz: Hickman, Schwartz, Reynolds and Haskin. It is thought that Briggs may do the same thing. But it requires seen votes outside of the Republican strength proper to elect Sherman, not counting his own. Green Adams, of Kentucky, has taken his sest. He arrived in the city last night. This makes it necessary for the Republiown 118. Adrain is in healistion, [Clark ditto, Briggs ditto, who would have redeemed his pledges ere this but for the poisonous influence of Jim and 'Rasi Brooks of the N. Y. Davis, of Ind., has an idea is his head that the Disunionists, Americans and Antis will all concentrate on him and elect him over Sherman! What nonsense will get into some men's heads. Riggs, of N. J., seems disposed to go over to the Disunionists, if a decent pretext for so doing offers. McClernand is bitten with the notion that he will yet be elected Speaker. He has joined the Lecomptonists and given in his allegiance. He was a Danite in disguise before he left Himois. But he will never get nearer that high office than he is now. The Dismion party thus refuse to inquire into the circumstances of the taking and plundering of the U. S. Armory at Liberty, Mo., because the sruns and ammunition were employed to invasfe Kansas, shoot free-soilers and plant slavery in that Territory by brute force. It is no crime in the eyes of modern Democracy to invade free territory and plunder and murder its inhabitants. Messrs Editors, make this fact known through the length and breadth of the Northwest. The Dismionists in the Senate have not yet announced their committees. There has been considerable discussion whether Donglas should be restored to the chairmanship of the Territorial Committee. Green, of Mo., said that he thought that as Donglas had made his submission to the that as Douglas had made his submission to the President and grounded his weapons of rebel-lion, that he should be forgiven and put back.

These expressions were reported to Green, and he now swears like a pirate that Douglas shall not be restored to the head of the Committee, but that he will have to sit on a back salf of the contempt he has committed. Missions and Mission Schools have been and are vet to be brought our public in the attractive way the ladies well know how to adopt in such cases. And it is a good plan and most successful, especially when managed on a fair basis. We have very cheerfully opened our columns to these enterprises.

—A few evenings since a large gathering of his friends, and members of his late charge here met socially at the residence of Rev. N. H. The numbers and the spirit manifested abundantly attested how firm a hold Mr. Schenek has upon not only his own recent charge, but has upon not only his own recent charge, but

has asked for some delay in deciding upon the call to Christ's Church, Carville. Rev. E. B. Tuttle is actively engaged in the work of the City Mission. Such an enterprise has long been needed. He has the hearty co-operation of ma-ny of the city rectors and earnest laymen in his

The measure has been made a test of Democracy, and there is no reason to doubt its passage in the House as that body is strongly Democratic. The antecedents of Gov. Stewart given as no reason so believe that he will prove an exception to the general rule. In the year 1850 there were 2,618 free negroes in Missouri. The number now in the State is probably less than 2,500—a law seriously affecting the rights of that class having drivan many of them from the State into 1850. Similar bills are pending in the Legislatures of Tempesses, Alabamis, and three or four other slave States. The strongest argument which the advocates of the measure have yet advanced in its favor is this, that as it is the intention of the Democrats to re-open the African slave trade, and obtain such legislation from Congress as will protect alsvery both in the Territories and the free States, it will be much change to supply the first demand for slaves by reducing the free negroes already here it diarray, than to go all the way to Airos for them. If must be admitted that is a mere business question this argument is management, and the first demand for slaves by reducing the free negroes already here it diarray, than to go all the way to Airos for them. If must be admitted that is a mere business question this argument is management, and the first demand to face the music, will doubtless thank us for firminating them with it.

The South had just as much right to object to the landing of Europeans in Northern ports as the North had for the landing of Africans in Southern ports, he said the South would soon get over her modesty and her asits on this great subject, and claim her oqual rights in the Union, and if she could not obtain them within the Union she had only to step out of it. He promised on another occasion to argue this subject more fally.

In the course of his remarks he spoke of the Union-saving meetings being held in the North. He pronounced them all hollow humbugs, and declared that the men engaged in getting them up were rotten on the alarry question. The President of the Hoston meeting, he said, was an abolitionist on his own confession; that Edward Everett was "abstractly" is good enough sort of body, but was a timorous old gentlemen who did not amount much in a crisis. Caleb Cushing promised well, but would not do for the South to tie to. He ran on in this style, pitching hot that, into the Union-savers, for whom he expressed the utmost centempt. I have now does with Dr. Rice and his pamphlet. If he can say that it contains " set one groutescryides," and convince any of his followers that what he says its truth, I shall not disturb their happy illusion. But I respectfully beg in a distinct communication, to lay before your readers what seems to me the true meaning of those scriptures which his pamphlet appeared to me to misapprehend and, prevent I our fellow citizen.

The "Higgse" Question—The Agitates I Mr. Lange, of Riceston, one of the ablest

At a meeting at the Board of Directors of this Company beld this day at their office, in this city, the following were adopted, vir.

Wasman, This Board has been notified by T. And waxnass, J. K. "bonzerraire," to discover that the sentiments of that paper were "glittering generalities," and were gotten up like a senuation novel for effect! West great fools, John Adams, Hanouck, Jefferson, Franklin, and the other signers were, to pledge their "lives, their fortunes, and their sacred honor," to its support! Misguided men! They thought they were doing a good thing.

dragged from the committee's room in the Russell House by main force, and rolled down the stairs.

Castello is also a young man, though perhaps a year or two older than Carroll. He has a Rured core spicously in police court smash; in this city at various times, and has the reputation of being a desperate fighting man. The evidence the committee have assimate him is of a different nature. It will be faily revealed in doe time.

The three are confined in seperate appartments at the jail, and prohibited from holding communication with each other ar outsiders.

From the admission of Carroll, as well as from the act is established that the murder was committee, the fact is established that the murder was committee the soon after 3 o'clock on Wednesday morning. The deposition of the pairolman Falmer, which has been looked upon with so much akepticises by the community, was unquestiously trashful. Mr. Champau, passed up the north side of Jefferson evenue in company with him until he reached the crossing at the cautre of the block between Bates and Kandolph streets, and then, seeing a light on the opposite side, was attraction of with the hope of meeting some friends, and reached the croasing at the centre of the block between Bates and Randolph streets, and then, seeing a light on the opposite side, was attreeted with the hope of meeting some friends, sind crossed over. The morderers had been dogging his sleps in the assantime, and when he satered the staircase of the building where the light was seen they followed him, and when he reached the head of the first bling and year him through the half of down the back stairs into the alley, and there out to Bates street, the opposite direction from where the partelines was known to be. He was knocked down in front of Hower to be the direction from where the partelines was known to be. He was knocked down in front of Hower to be the direction from where the partelines was known to be. He was knocked down in front of Hower to be the direction from where the partelines was known to be the was knocked down in front of Hower to be the street, the opposite direction from where the land the advantaged in the water and thrown in.

The termination of the painful supprise in which the community, in common with the immediate relatives of the deceased, have been so long placed, however tragical, will be a relief. Mr. Champau leaves a wife and two small children, with whom the critisens of sil clauses will sympathies in their sad affictions. He has ever deported himself as an apright and hoposable greatenan, and was highly esteemed by all who knew him. He was born in Detroit, of one of the oldest families, and has ever resided here. His acquamtance is therstoye very extensive. This is not confined to Detroit alone, but throughout the Vestern cities, and in Canada he had many warm friends who will learn of his desta with sincers acrew. He leaves an ample fortune to his family. His age we believe was forty.

It is common to altribute the cause to the luxury or efferminancy of the other ustions. This may be admitted to a certain extent. The man who has learned to think for himself, and to fisel and cherish the sense of personal independence, in not easily conquered. It matters little, whether he live in Greece, England or America; whether he fight under Leonidas, Hamplen, or Washington, it is the energy of mind and the sense of independence, acquired by the habit of freedom which makes him superior to any people not so conditioned. With little training in actual war, the people of the United States are yet a thoroughly martial people. Their care tingle to the sound of the drum; their imagination dwells on the glory of their country; and they are quick to the sense of injury and insult.
